

Wednesday 20th November

SCI WALT: experiment to identify adaptations

WILF: Ⓛ TL:

Aim:

We are going to find out which beaks are best for different foods.

Equipment:

- Stop watch
- Tweezers
- Scissors
- Spoons
- Forks
- Lolly-pop sticks
- Pipette

Fair Testing:

- To ensure we have a fair test we will keep the following things the same:
- The items we use for the beaks
- The size of the trays
- The time for eating

Results

Item	Worms in the mud	Seeds in Sand	Leaves in water
Scissors	9	15	18cm
Large Tweezers	6	11	13cm
Fine Tweezers	11	35	13cm
Pipette	4	27	13cm
Fork	7	55	18cm
Lollypop Stick	10	146	17cm

Spoon

5

75

(22cm)

The best beak for the worms were

the fine tweezers. The best beak for the seeds was the ~~fork~~ ^{fork}. The best beak for the leaves was the spoon.

⑥ WILF

Great investigation Addy. WIUT and TL please.

DIRT →

Our investigation was good but not perfect.

Can you think of any ways we could make it an even FAIRER test?

People were racing.
true.
